Assignment 1 - Resume

in increasing importance...

- 1. Debug Output
- 2. Language
- 3. Start early!
 - At least look at it early
 - Go to the tutor-sessions
 - ASK QUESTIONS!
- 4. Remember the question chain!

- Load output from assignment 1
- Calculate outlier threshold
 - $\theta = \bar{x} + 2 * \sigma$
 - Define functions for mean and std
- Store indices of detected strokes as CSV
- Test your program
- Upload to the Palme

- Load output from assignment 1
- Calculate outlier threshold
 - $\bullet \theta = \bar{\mathbf{x}} + \mathbf{2} * \sigma$
 - Define functions for mean and std
- Store indices of detected strokes as CSV
- Test your program
- Upload to the Palme

Submission Reviews

a.k.a.: 'Abgabegespräche'

- Cover assignment 1 and 2
- Help us understand your code
 - Explain your code
 - Answer question
- ⇒ Get Feedback

- 12th 16th of December
- Registration via Palme
- Room PZ205032 (Inffeldgasse 13/V)
 - Location may be subject to change!
